

METRO

Doors with imagination

That's the creative message of Metro... a unique combination of exotic timber species that adds drama by using the grains in vertical and horizontal combinations to set off their beauty. Let your imagination create a masterpiece with your choice of veneers and grain direction. Metro's signature is a subtle highlight of ultra-slim white veneer to complement the contrasting colours of the timbers.

Select hardwood provides the internal frame for these flush construction doors while William Russell's SoundCore™ technology cuts down sound transmission while offering light weight yet sturdy construction qualities.
